21st Century Learning

Entrepreneurship Online

Entrepreneurship online has become one of the best alternatives for many people who like or get along with everything related to technology. In addition, you can combine it with your current job, you can do it from home and many times you do not need a big investment to start. Sounds good, doesn't it?

One thing you need to be clear about before you start is that not all that glitters is gold. Going online and creating an ecommerce is not something you can do overnight. It will take you many hours and it will take you a lot of effort to come up with an idea that really works and that you can translate into an online business.

The 3 main challenges teachers face in today's classroom

DBalancing the different learning needs of students.

Respecting expectations from school/university admins.

3 Helping parents and students meet longterm goals.

Question???

- What interests you about this online education business management?
- What do you want student/people to know about this online education business management?

1. Meaning of Online Education"

Online learning is another form of educational innovation that can transform traditional learning methods into new learning methods that use technology to help teach. In addition, the other meaning also refers to distance learning and web site learning.

Meaning of Educational Innovation"

Educational innovation refers to the introduction of new things that may be in the form of ideas or actions, including any invention, into the education system in the hope of changing existing ones to make the education management system more efficient. This enables learners to learn quickly. Motivate you to study and save more time in studying.

Meaning of Educational Technology"

Educational technology refers to the science of educational methods, which encompasses the use of systematic methods to improve the efficiency of education. Educational technology encompasses three components: materials, equipment, and methods.

enu)"),d=d&&d.replace(/.*(?=#[^\s]*\$)/ a"),f=a.Event("hide.bs.tab",{relatedTarget:b[0]}),g=a.Event("show.bs.tab",{relatedTarg ented())(var h=a(d);this.activate(b.closest("li"),c),this.activate(h,h.parent(), m.bs.tab",relatedTarget:e[0]})})}}},c.prototype.activate=function(b,d,e ").end().find('[data-toggle="tab"]').attr("aria-expanded (idth,b.addClass("in")):b.removeClass("fade"),b.parent(' tr("aria-expanded",!0),e&&e()}var g=d.find("> .active") a.fn.tab.Constructor=c,a.fn.tab.noConflict=function(){return ck.bs.tab.data-api",'[data-toggle="tab"]',e).on("click.bs.ta this.emh(function(){var d=a(this),e=d.data("bs.affix") is options=a.extend({},c.DEFAULTS,d),this.\$tag k.bs.affix.data-api",a.proxy(this.checkPos non());c.VERSION="3.3.7",c.RESET="affix affi .scrollTop(),f=this.\$element.offset(),g=this (e+this.unpin<=f.top)&&"bottom":!(e+g<=a-d)&&"b ottom"},c.prototype.getPinnedOffset=function(){icarget.scrollTop(),b=this.\$element.offset():rot

2022's top 8 classroom challenges, according to teachers

••Lack of teamwork, empathy, and support between students

Teachers working too many roles at the same time

8 No time to deal with bodily functions!

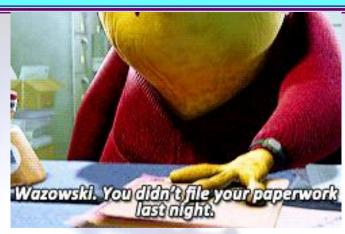

Teachers being made accountable for more than they should

6 Not enough time to plan

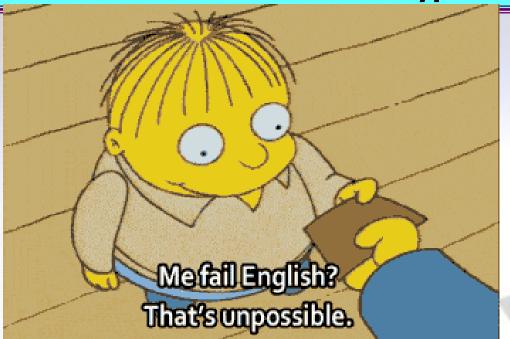

© Excessive paperwork for data collection

Keeping up with the expectations of school/University admins

Applying a prescribed curriculum to all types of students

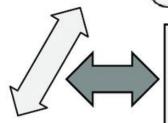

2. Model of "Online Education

Online Education Component

Learners

- Expectations
- Readiness
- Learning styles
- Technical skills
- Identity
- Isolation
- Participation

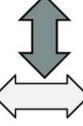

Institution Support

- -Instructor professional development
- -Student training
- -Technical and multimedia support

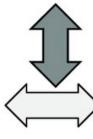

Content

- Development
- Delivery via multimedia
- Instructional strategies
- Considerations
- Assignment
- Assessment
- Feedback

Instructors

- Changing the role
- Transition to online
- Communication barriers
- Student vs faculty lead courses
- Instructor interest
- Instructor preparation
- Time management
- Teaching styles

Main characteristics of online teaching

- 1. Students can be anyone, anywhere. Study anytime It is important to follow the convenience of the learners because the online school has opened a website that is available 24 hours a day.
- 2. There are all types of media presented on the website, such as text, still images, animations (Multimedia), audio and video, which will stimulate the interest of learners in learning as well. It also makes it easier to visualize content.
- 3. Students can choose the subject according to their needs.
- 4. Documents on the website with links to other sources of knowledge broaden the scope of learning and allow for deeper learning.

Courseware

Courseware refers to content and learning techniques that are transformed into electronic media and can consist of Class Notes, Scanned Images, Textbooks, Tutorials, and Assignments of instructors presented with Internet, intranet, and extranet technologies.

Teaching materials such as training materials, coursebooks, instructor's guides, student's guides, technical guides, self-paced multimedia and PowerPoint teaching materials, etc.

Courseware **—**

CAI, WBI and e-Book

CAI (Computer Assisted Instruction) refers to computer-assisted instruction programs created in the form of electronic files. To train learners to learn things through computers, where students will be able to learn and interact with the lessons.

WBI (Web-Based Instruction) refers to computer-aided instruction delivered over the Internet. Students can learn on the Internet by keying the URL they want to study, WBI will be born before e-Learning and developed into the current e-Learning.

e-Book refers to the development of various aspects of knowledge in the form of electronic books by learning through computers and networks.

e-Learning

Technology-based learning, which covers many learning methods such as Computer-Based Learning, Web-Based Learning or Teaching and Learning Development through the Website or Applications, which is a teaching and learning management system that connects learners and instructors and between learners and learners (Learning Management System).

e-Learning

Electronic learning or e-learning is a general term used to refer to Internet-based networked computer-enhanced learning. A specific and always more diffused e-learning is mobile learning (m-Learning), it uses different mobile telecommunication equipments, such as cellular phones.

The e-Learning embracer 6 attributes or philosophies

- 1. e-learning is learning on internet-aged steroid, real time, 24/7/365, anywhere, anytime and networked.
- 2. e-learning embracer the learning process from assessment through testing and sometimes certification.
- 3. web-delivered, typically assembling learning experiences on the fly from the freshest information.

The e-Learning embracer 6 attributes or philosophies

- 4. Provides a mix of learning methods, Virtual classroom, simulation and collaboration.
- 5. Incorporates registration, payment and charge-backs, monitoring learner progress, administering tests and exams, Maintaining learner records.
- 6. Learner centric and personalized 1:1

Benefits of teaching materials "e-Courseware"

- 1. Increase flexibility in time and place.
- 2. Cost Savings.
- 3. Choose a subject of interest.
- 4. It is accurately conveyed and interesting.
- 5. Expand opportunities for exchange of ideas
- 6. Tracking learner progress.
- 7. Learning technology goes hand in hand with lessons learned.

Courseware Produce

The production of teaching materials has steps as follows:

- 1. Preparation
- 2. Design Instruction
- 3. Flow-Chart Lesson
- 4. Story Board
- 5. Program Lesson
- 6. Production
- 7. Evaluation and Revise

Global Education R&D

Strategic, nonhierarchical leadership maximising autonomy

Systemic data gathering and versatile methodological approaches with a concern for developing educational innovation

Customer-orientation, and encouragement of team members to develop and own kternal relationships

Hybrid expertise of teacher educators as researchers, coaches and service designers Ability to dialogue engaging vision allowing overlap and informal integration internally and externally

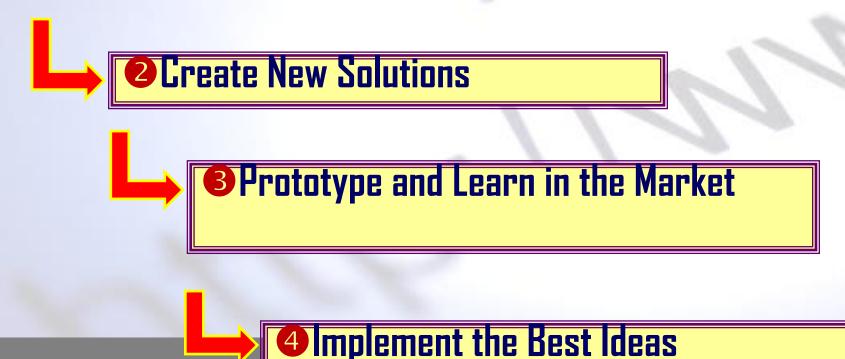

Strong focus on innovation within the identified capacities of team members engaged

Flexible project organizations based teams' committment

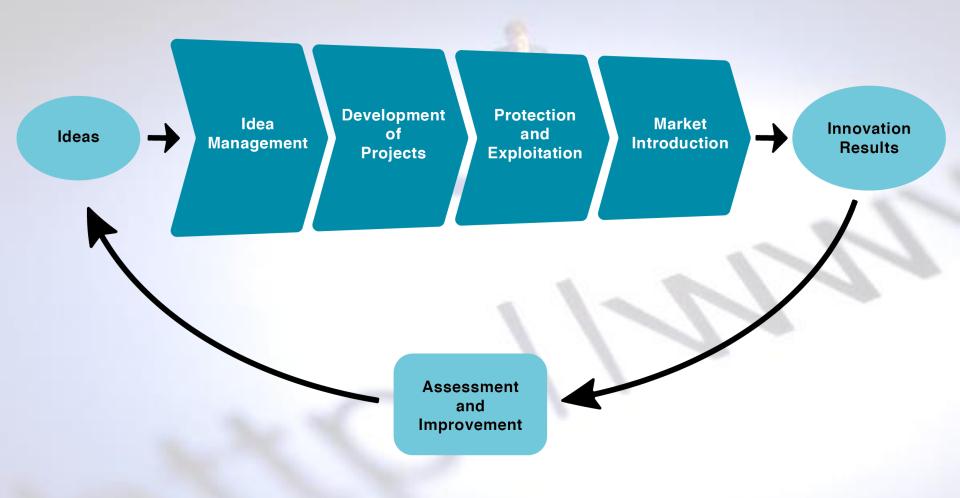

3.Online Education Business Management Process

Four Steps to an Effective Innovation Process

Observe Your Customers to Uncover New Problems—and Opportunities

Innovation Development Process

Educational Innovation

- ✓Innovation in teaching style
- ✓Innovation in instructional practices
- ✓Innovation in class organisation
- ✓Innovation in the use of textbooks in classrooms
- ✓Innovation in the methods of assessment used in classrooms
- ✓Innovation in the availability of computers and the internet in the classroom
- ✓Innovation in the use of computers in the classroom
- ✓Innovation in the provision of special education in schools
- ✓Innovation in the extent of teacher collaboration in schools
- ✓Innovation in feedback mechanisms in schools
- ✓Innovation in evaluation and hiring in schools
- ✓Innovation in schools' external relations

The Process of Innovation in Teaching and Learning

Innovation in Education Starts With This Question;

What is best for this learner?

Innovative Practice

Best Practice

Reflect, Revise, Remix

What does this learner need? What can I develop with what I know? How is this meeting the needs of learners?

What could I do differently? What was successful and why?

George Couros -#InnovatorsMindset

How to Start an Online Business: 6 Steps to Consider

- 1. Investigate, observe and learn from your competition
- 2. Create a business plan
- 3. Creates a minimum viable product
- 4. Create your website
- 5. Legally formalize your business
- 6. Create an online marketing strategy

Before going online: analyze your business idea

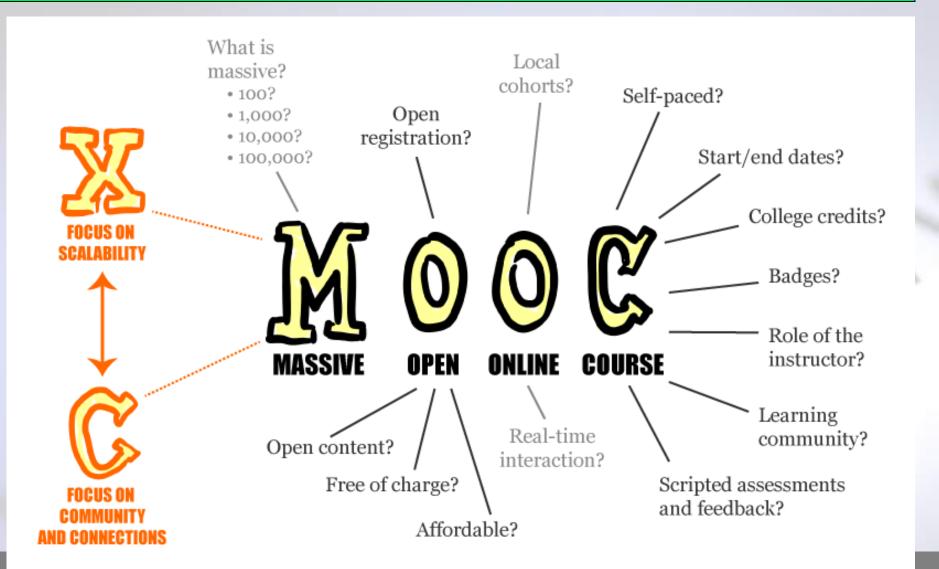

- 1. Your product has something different that can replace something already on the market. You have to be able to convince your target audience that yours is better, but are you clear on how to do it?
- 2. It's a business idea with a future. Automation, technology, user experience and globalization are changing the world. Is your business idea ready to adapt to the changes?
- 3. It's a scalable business. We say that a company is scalable when they have a very strong growth potential, being able to increase their profits by making a much smaller investment in their infrastructure
- 4. You know the buying cycle of the product. It is one of the points you should not forget when making predictions about how much you are going to enter. A product with a purchase cycle of 2 months is not the same as a product with a purchase cycle of 3 years.

To start setting up your website you need:

- (1) A web hosting plan: the space provided by a web server for a page to be visible and operational 24 hours a day from anywhere in the world.
- (2) A domain: in other words, the URL address of your website. You need to choose a domain name that identifies your business idea and that your customers can easily remember.
- (3) SSL Certificate: simply essential. The security of a website is very important, not only for your visitors, but also for Google.
